

Hydrogen and decarbonization mission Torino- July 1° 2022

ACEA PINEROLESE INDUSTRIALE SPA

In collaboration with

And in collaboration with the Regional
Innovation Clusters of Piemonte

per una crescita intelligente,
sostenibile ed inclusiva
www.regione.piemonte.it/europa2020
INIZIATIVA CO-FINANZIATA CON FESR

ACEA is a modern Italian multi-utility company, which currently provides services for Municipalities, private companies and citizens.

In more than 150 years, the company has continued its growth and the current Group operates on three main services: environment, water and waste water, energy.

Acea Pinerolese Industriale SpA is the joint stock company that control the Group.

The special feature of the corporation is that the shareholders are the 47 Municipalities.

ACEA carries out the following services:

- Environmental services: management of the urban solid waste collection, waste treatment and disposal. The sector operates in the Pinerolo area - south west of the Province of Turin- for 47 Municipalities and 150.000 inhabitants.
- Energy Services: through a grid of about 690 km, the sector is responsible for natural gas distribution and heat management in 24 Municipalities in the area.
- Water and waste water services: for the management of the integrated water system of 61 Municipalities for 200.000 inhabitants.

What are we looking for

Hydrogen and decarbonization mission
Torino- July 1° 2022

ACEA carries out many research and innovation project that focus on clean energy production, green chemistry and green communities.

ACEA is interested to develop new collaborations with local and international partners in research and development activities with the aim of seeking innovative solutions on the topics of our interest (energy and recovery of process waste).

What can we offer

ACEA is available to create synergies and new relationships with new partners to participate to EU projects.

We can offer a platform that can test on site different waste / energy flows with connections already set up to the main utilities needed (electricity, gas, water, thermal energy, wastewater discharge).

We have already established collaborations and partnerships with both national and international universities and research centers, as well as with industrial partners.

For a company/cluster/research center, collaborating with ACEA can be an advantageous opportunity thanks to the proven experience in R&D at various levels and the availability of infrastructure for testing pilot plants.
